DETAILED ACTION

Election/Restrictions

1. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The species are as follows:

Ia - embodied by Figure 1 wherein there is internal clamping

Ib - embodied by Figure 2 wherein there is external clamping

An election must first be made among the above two species, then there are two additional species as follows:

IIa - embodied by Figure 6 wherein the expandable seal is a seal cup, which is passive

IIb - embodied by Figures 1 and 2 wherein the expandable seal is expanded by a drive system

Applicant is required, in reply to this action, to elect a single species from Ia or Ib, and then a single species from IIa or IIb, to which the claims shall be restricted if no generic claim is finally held to be allowable. The reply must also identify the claims readable on the elected species, including any claims subsequently added. An argument that a claim is allowable or that all claims are generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration of claims to additional species which are written in dependent form or otherwise include all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims are added after

Art Unit: 3676

the election, applicant must indicate which are readable upon the elected species. MPEP

§ 809.02(a).

2. The claims are deemed to correspond to the species listed above in the following manner:

Ia = claim 10

Ib = claim 9

IIa = claims 2-3

IIb = claims 4-7 and 11-36

The following claim(s) are generic: 1 and 8.

*** NOTE:** There are two claim 2's, thus there are actually 37 claims. Applicant is respectfully requested to correct this in the next response. The numbering referred to above is in accordance with the Applicant's numbering, thus both claim 2's go with species IIa.

3. The species listed above do not relate to a single general inventive concept under PCT Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding special technical features for the following reasons: The species are independent or distinct because claims to the different species recite the mutually exclusive characteristics of such species. In addition, these species are not obvious variants of each other based on the current record.
